You got a back injury at school, some play ground, and it is playing up, skipping or something?

Go swimming and stretch the muscles. Swimming is best. Will cause you a lot of discomfort....

May have to cancel a few shows, like the Voice, or something?

The back specialist you are seeing will do more harm than good, go swimming.....

He needs the money and could not care. He really did do a bad job, and caused you more pain, you could not work...

The diet pills you are taking are making you shit your pants? You may get caught out?

And pee too? They are like laxatives....

Go on a Rice diet...? The Messiah's Diet!

Spaghetti is not you kind of thing, but you really do need it? No energy....

This will last for a long time, it's because of those diet pills.....

Wake up to yourself...

You may be inundated with flu's and wonder what is wrong with you, it's because of those pills

You're not speaking to your sister, boyfriend issues, make up, she misses you....

I know you saw straight, but it is her life....may be Royalty, not the kind you mess with?

She really did make a fool of herself.....?
